Chamberlain Hrdlicka Makes Juristat's Top Patent Firms

Chamberlain Hrdlicka ranked in the Technology Center 2100 Category

February 2, 2022

Chamberlain Hrdlicka has been ranked among Top Patent Firms by Juristat, in the Technology Center 2100 category, which encompasses patent applications relating to computer architecture and information security, from companies such as Dell, IBM, Microsoft, and Intel. The firm was among only eight firms to place among top ten in more than one criterion, having ranked first in the average office actions before allowance and placing seventh in the allowance rate rank, resulting in the overall third place on the Juristat Rank.

"We're thankful to Juristat for creating an objective ranking to assist technology companies select the best patent law firms to protect their products and services," said Aly Dossa, Intellectual Property shareholder and chair of the Data Security & Privacy practice at Chamberlain Hrdlicka. "With decades of experience in patent law combined with extensive technical backgrounds, our patent team understands both the technology behind our technology clients' product or service and their legal and business challenges, allowing us to develop and implement effective IP protection strategies, from idea to issuance."

Juristat's rankings are based on its database of more than 10 million pending, abandoned, and granted patent applications, enabling an objective analysis of the performance of every law firm practicing within the United States Patent and Trademark Office (USPTO). For each technology center, Juristat identifies the top firms in each of three criteria – allowance rate, average office actions before allowance, and volume of applications filed. Firms are ranked on each of those three key metrics, as well as receive the overall ranking – the Juristat Rank, calculated by taking into account the firm's rank for key metrics, as well as rewarding firms who ranked in more than one category, to reflect which firms have the most well-rounded performance in each tech center.

"When searching for a patent firm, we know companies and inventors want a partner that's attuned to their specific industry and technologies," said Danielle Hohmeier, Director of Marketing at Juristat. "That is why our rankings of the Top Patent Firms take into account both experience and performance within each specific technology center. Chamberlain Hrdlicka should be proud to be named among the best of the best."

The analysis for TC 2100 was conducted in December 2021, and analyzed public applications disposed (or in the case of the first metric, applications filed) between January 1, 2019, and December 31, 2019. To qualify for inclusion, a firm must have
