

FEE STRUCTURE & CASE MANAGEMENT

In order to manage client expenses, maximize efficiencies, and ensure that HSG's interests are fully aligned with our clients', HSG seeks wherever possible to implement fee arrangements based on agreed measures of value rather than on the billable hour. While hourly billing remains an available option for those clients who want it, our preferred approach to fee structuring allows clients to anticipate and contain the cost of litigation in a more predictable way, and allows our lawyers to focus solely on winning their cases.

HSG seeks to assign the most appropriate lawyers and other resources to our cases. In general, we believe that staffing our cases leanly leads to better attorney development and, most importantly, better results for our clients. We use technology to increase efficiency wherever possible, while being mindful of the security of our clients' confidential information.
